

Dear Parents and Carers

We would respectfully like to remind you that photos taken at school events are not to be shared on any social media platform unless they are of your child/children, or you have consent from other families to share photos of their child/children.

Unfortunately, photos taken at Sports Day were shared on social media, despite us requesting that parents/carers did not do this. We have a number of vulnerable children in our school and for some of our families, it is a major safeguarding concern, if their photo even accidentally appears on any social media platform.

Can we please ask, that if you have shared any photos that have other children in other than your own, that you remove them, unless you have permission from the child or children's parents or carers. We want you to be able to share these lovely events with your friends and family, but please remember some children's images cannot be shared on social media under any circumstances.

Thank you for your understanding and support.

Kind regards
KKPS

Kind Regards
Karen Strachan
