

FOREST SCHOOL

This month at Forest School, we found Oakley and Hazel Bear waiting for us with one of their friends, Buttercup the Bunny. The children had a chance to meet all of Buttercup's friends, including Milo the Millipede and Collin the Caterpillar, before reading the story 'We are going on a Bug Hunt'.

Once they had learnt about the different minibeasts they might find in the woods and how they use camouflage to hide, the children set off in teams to go on a bug hunt.

The children had a great time working out where minibeasts might live and hide. They collected and handled a range of minibeasts, looking carefully at the features of each one.

At the end of the bug hunt, the children shared their findings with their peers. The group demonstrated good recall of the different species found.

The children learnt about how to care for the creatures in our woodland and the importance of placing the creatures they found back into the correct habitat.
