

FOREST SCHOOL

This month at Forest School, Year 5 have been busy orienteering around the Forest School site.

The groups demonstrated good recall of all 8 points of the compass and applied their knowledge of compass directions in order to orientate their map. The children then learnt how to read 6 figure coordinates and pinpoint exactly where on the map they needed to go.

The children used their maps, compasses and coordinates to guide them around the forest. At each coordinate location, the children found either a picture or fact about the Ancient Egyptians

At the end of the trail, the children came together to match and discuss the different pictures with the correct facts.

They finished with a review of the session and the Forest School Prayer.
